

D-BOARD® Light

Graphic cardboard 100% recyclable

Ecological and versatile material

- Strong structure
- Lightweight
- Excellent printability
- 100% Recyclable
- Environmentally-friendly

D-Board® Light can easily be printed, shaped or cut into elements required for print or constructions.

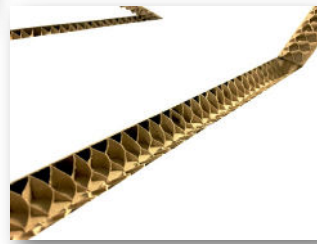

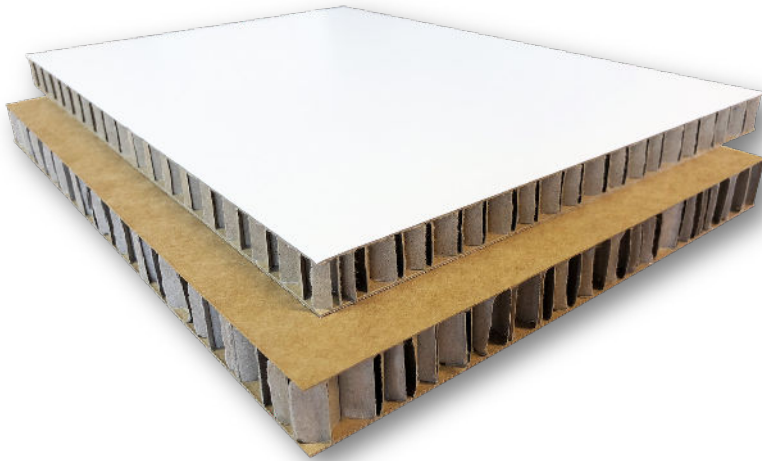

Sustainability is your contribution to the environment

The D-Board® Light is a graphic cardboard which is designed for flat printing, adhesion, glueing, stand construction, furniture, displays for different events and P.O.S. Its production incorporates recycled cardboard with **100% recyclable raw material**. Its hexagonal (honeycomb) cellular structure and superior raw material makes them also structurally strong providing exceptional strength and rigidity.

D-BOARD LIGHT QUALITIES

The D-Board® Light is a structure reminiscent of the very durable flatter and smoother Honeycomb cells which allows a more precise impression and offers an easy and clear cut. The boards with a thickness from 10 to 19 mm give the freedom to create objects and structures in 3 dimensions at a low cost.

The D-Board® Light with Kraft colour is designed for all the jobs where you want to show the recycled and/or ecological side of your projects.
